DVR/NVR FORENSIC INTELLIGENCE REPORT

Case: TRX-2026-001 — Warehouse Perimeter Incident

Investigator: Demo Investigator

Generated: 2026-09-03T11:26:04.876133+00:00

Evidence Inventory

Evidence ID	Filename	SHA-256	Integrity
EVD-0001	CAM01_20260901_220000.mp4	DEMO-HASH-0001	VERIFIED
EVD-0002	CAM02_20260901_220000.mp4	DEMO-HASH-0002	VERIFIED
EVD-0003	CAM03_20260901_220000.mp4	DEMO-HASH-0003	VERIFIED
EVD-0004	CAM04_20260901_220000.dav	DEMO-HASH-0004	VERIFIED

Analysis Methodology

SHA-256 integrity verification, FFmpeg/ffprobe metadata extraction where supported, OpenCV-compatible processing, and advisory demo analysis. Automated findings require investigator verification.

Limitations

This prototype does not decode every proprietary DVR format. Demo detections are simulated and clearly labelled. Potential gaps are not conclusions of tampering.

Disclaimer

This prototype is intended for demonstration and investigative assistance. Automated analysis results require investigator verification and should not be treated as standalone forensic conclusions.
